## PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building modern, scalable, and user-focused web applications using **React.js, Next.js, TypeScript, Tailwind CSS, and Framer Motion**. Skilled in creating responsive interfaces, reusable component systems, interactive animations, and high-performance frontend architectures.

Experienced working in collaborative environments through internships, freelance projects, and real-world product development. Strong understanding of **SPA architecture, REST API integration, responsive design principles, and front-end optimization techniques**.

Passionate about crafting seamless user experiences, writing clean, maintainable code, and building products that solve practical problems across frontend and blockchain ecosystems. Currently expanding expertise through professional frontend training at **FlexiSAF** while developing strong soft skills in productivity, collaboration, communication, emotional intelligence, and problem-solving technology professionals.

## TECHNICAL SKILLS

### 1. Frontend Technologies

HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, Framer Motion

## 2. Blockchain Technologies

Solidity, Web3 Frontend Integration, NFT Marketplace Interfaces

## 3. UI / UX & Architecture

Responsive Design, Mobile-First Development, SPA Architecture, Component-Based Design, Accessibility (a11y), Interactive UI Design, Animation Systems

## 4. Development Practices/

Reusable Components, Code Refactoring, Debugging, State Management, Performance Optimization, Scalable Frontend Architecture

## 5. APIs & Data Handling

REST API Integration, Client-Side Data Management, Local Storage Handling, JSON Data Handling

## 6. Tools & Workflow

Git, GitHub, VS Code, Figma, Agile/Scrum, Vercel, Netlify

## Additional skills

Cross-Browser Compatibility, SEO Basics, Testing & Debugging, UI Consistency, Deployment Workflows

---

## PROFESSIONAL EXPERIENCE

---

### Frontend Developer (Internship) — FlexiSAF

2022 – Present

- Contributed to the development of user-friendly and scalable frontend applications using React.js, TypeScript, and Tailwind CSS
- Worked within a collaborative development environment alongside engineers and product teams
- Developed responsive UI components and improved application usability across multiple devices
- Participated in frontend architecture discussions, debugging, and feature implementation
- Strengthened understanding of production-ready application development workflows
- Gained practical experience with teamwork, communication, and Agile development processes

## Frontend Developer — Freelance / Remote

### 2025 – Present

- Building modern, responsive, and animated web applications using React.js, TypeScript, Tailwind CSS, and Framer Motion
- Transforming UI/UX concepts into scalable and maintainable frontend systems
- Developing reusable component structures for faster development and consistent interfaces
- Optimizing performance, transitions, and responsiveness for smooth user experiences
- Integrating frontend applications with APIs and dynamic client-side data handling
- Deploying production-ready projects using Vercel and Netlify
- Collaborating with clients to deliver visually polished and user-focused digital products

## Frontend Developer (Internship) — HNG Internship

### 2024 – 2025

- Participated in an intensive frontend engineering internship focused on real-world application development
- Built production-ready frontend projects using modern JavaScript technologies
- Collaborated with teams in fast-paced development cycles and task-driven workflows
- Improved problem-solving, debugging, and frontend optimization skills through practical tasks and team collaboration
- Worked on responsive interfaces and scalable component structures

## Frontend Developer (Internship) — Chainindustry

### 2023 – Present

- Worked on real-world frontend development projects within a collaborative environment
- Assisted in building responsive interfaces and interactive user experiences
- Contributed to frontend implementation, UI consistency, and design responsiveness
- Improved understanding of software development workflows and collaborative coding practices

## SELECTED PROJECTS

### 1. Dali Wears — E Commerce Fashion UI

 [Dali Wears](#)

A modern storefront interface for clothing brands.

- Developed a modern fashion storefront interface
- Engineered product listings, category filters, and navigation flows
- Built reusable card components and responsive grid systems
- Maintained strong brand consistency and mobile usability

### 2. City De Fitness — Premium Fitness Platform

 [City De Fitness](#)

A modern fitness platform focused on premium UI/UX, responsive layouts, and engaging interactions for fitness brands and communities.

- Developed modern animated interfaces using React.js, TypeScript, Tailwind CSS, and Framer Motion
- Created visually engaging user experiences with responsive layouts and interactive animations
- Implemented scalable reusable component structures for maintainability
- Focused heavily on branding consistency, responsiveness, and performance optimization

### 3. NFT Marketplace — Web3 Marketplace Interface

#### [NFT Marketplace](#)

A decentralized NFT marketplace with smart contract integration and wallet-ready frontend architecture.

- Developed modern animated interfaces using React.js, TypeScript, Tailwind CSS, and Framer Motion
- Created visually engaging user experiences with responsive layouts and interactive animations
- Implemented scalable reusable component structures for maintainability
- Focused heavily on branding consistency, responsiveness, and performance optimization

### 4. ATS Pro — Resume & ATS Checker

#### [ATS Resume Checker](#)

A multi-step university admission platform developed during internship training.

- Built a responsive admission management platform using React.js and Tailwind CSS
- Developed multi-step form workflows for applicant information processing
- Implemented structured academic and guardian data collection systems
- Integrated routing, form handling, and dynamic application management
- Focused on usability, clarity, and mobile responsiveness

### 5. Apply Now Admission Portal — Resume Optimization Tool

#### [ApplyNow Admission Portal](#)

A multi-step university admission platform developed during internship training.

- Built a responsive admission management platform using React.js and Tailwind CSS
- Developed multi-step form workflows for applicant information processing
- Implemented structured academic and guardian data collection systems
- Integrated routing, form handling, and dynamic application management
- Focused on usability, clarity, and mobile responsiveness

### 6. WhatsApp Bot

#### [Whatsapp Bot](#)

A WhatsApp-inspired messaging interface designed with AI-ready architecture and modern interaction systems.

- Developed fast and interactive chat UI systems using React.js and TypeScript
- Built responsive messaging layouts with smooth transitions and animations

- Focused on scalable frontend architecture suitable for future AI integrations

## 7. NextVest — Blockchain Investment Platform

### [NextVest Investment Platform](#)

A modern investment platform combining frontend engineering with blockchain-powered architecture.

- Developed a blockchain-focused investment platform using React.js, TypeScript, Solidity, and Supabase
- Built responsive dashboards and investment tracking interfaces
- Integrated scalable UI systems for digital investment workflows
- Focused on performance optimization and modern user experience patterns

## 8. Landing Page Generator

### [Landing Page Generator](#)

An AI-inspired landing page generator with customizable layouts and live preview concepts.

- Built a dynamic landing page generation platform using React.js and Tailwind CSS
- Developed reusable layout structures and modular UI systems
- Focused on conversion-friendly design and responsive visual consistency
- Optimized frontend performance and deployment workflows

## 9. Smart Invoice — Invoice Management System

### [Smart Invoice](#)

A web application for creating, managing, and exporting professional invoices.

- Built a clean invoice management system using Next.js, React.js, and Tailwind CSS
- Designed responsive invoice interfaces optimized for both desktop and mobile devices
- Focused on form usability, structured data presentation, and user-friendly workflows
- Developed reusable frontend components for invoice generation and management

## 10. ClientPilot

### [ClientPilot](#)

A lightweight client management platform for freelancers and small businesses.

- Built responsive dashboard systems for managing clients and project statuses

- Developed organized UI structures for tracking notes and workflow progress
  - Implemented reusable frontend components for scalability and maintainability
- 
- 

## EDUCATION

---

---

- **University of Uyo, Nigeria**
- **FlexiSAF, Abuja**

## CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

---

---

### [FlexiSAF Frontend Development Training](#)

Currently undergoing professional frontend development training focused on modern web engineering practices and scalable frontend systems.

### [Distinction Soft Skills Program](#)

**Training focused on:**

1. Productivity
2. Collaboration
3. Problem Solving

### [Distinction Soft Skill Program](#)

1. Communication
2. Emotional Intelligence for Tech Professionals

**Reference(s) are available on request.**
